

EVOLUTION: HOW FAR CAN WE GO?

BADT NATIONAL CONFERENCE 2018

The Oxford Belfry, Oxford
28th - 29th September 2018

EVOLUTION: HOW FAR CAN WE GO?

BADT NATIONAL CONFERENCE 2018

The Oxford Belfry, Oxford
28th - 29th September 2018

Dear members and guests,

We hope you will be able to join us at our third boutique-style conference in Oxford - a centre for learning, progression and the exchange of ideas. This year's conference will explore the changing and evolving role of the Dental Therapist and how the HEE Education reform piece and pending contract reform will mould and shape the profession. We need to be focused and ready for the opportunities and responsibilities ahead.

Topics covered will include: Enhanced CPD, Exemptions from prescribing and Minimally invasive treatment planning and practice. We have created a future focused programme that aims to build on the knowledge base of the Dental Therapist's existing scope of practice; with thought provoking speakers and hands on workshops that we hope you will enjoy. We are delighted to have Eric Rooney, Deputy Chief Dental Officer, England in attendance to give us a future forward view. We will all be ready for the changes ahead.

We are grateful to our Industry sponsors who will be in attendance on the 28th.

We look forward to seeing you in Oxford for an exciting 48 hours.

Amanda Gallie
BADT President

19.30	Drinks reception
20.00	Presidential dinner

Saturday 29th September 2018 - Hands-on workshop sessions

9.00am Coffee, refreshments

9.30am Enhanced CPD
Janet Collins, Head of Standards, GDC

10.15am **Rotational workshops**

- Splinting traumatised anterior teeth - Nikhil Sethi

Nikhil will be teaching a hands on workshop to cover the practical aspects of treating traumatised anterior teeth including reattachment, isolation and restorations.

- Implant maintenance - Amanda Gallie and Chris Worthington

Amanda and Chris will guide you through the principals of guided biofilm therapy in relation to implant care. You will gain knowledge about how to probe, how to consider the peri-implant structures, potential tissue changes in health and disease and a hands on of ow to clean round an implant using the EMS system.

- Bulk fill and matrices - Dentsply

Delegates will gain knowledge of the theory and chemical composition of the innovative bulk fill dental material, its modes and applications in the completion of a direct Posterior restoration. A hands on component will allow delegates to fill a posterior tooth with the new material and learn how it is best handled and manipulated for optimal results.

- PSPs, How why and when? - Jane Dalgarno

Jane will examine the requirements of the new ECPD scheme and the impact it will have on planning and completing your learning.

- Stainless steel crowns, the Hall Technique - Fiona Sandom

Fiona will be teaching a practical approach to patient selection and providing stainless steel crowns using the Hall Technique. Delegates will understand the benefit and method of this technique for restoring deciduous molar teeth.

1.15pm Lunch and close
